

The Story of THEY

Aynne has been in constant Spirit communication for many years. However, it wasn't until approximately 1989, that she finally asked just who it was that she had been speaking to all this time? (most of this is done by silent transmission.)

She felt several powerful Light beings come forward, and announce that they would be known simply as THEY. She asked why the name THEY?? Why not give her some names; some individual personalities?

She was told that THEY were a combination of Light Energy beings, and that the individual personality was more of a human perception. She was also told that the Light Energy beings who were THEY that dealt with her on a regular basis, also changed in numbers depending on what was needed at the time. In other words, 'specialists' came and went as needed.

She persisted, and asked THEY who they were? Were THEY angels? Were THEY guides? Who were THEY?

THEY have proved over and over to have a delightful sense of humor, and when Aynne persisted in asking who THEY were, THEY answered:

"We're the Big Shots!"
